SUMMARY

I am a keen information security professional, currently working for a Cloud IT provider, overseeing the confidentiality, integrity, and availability of information systems. I pride myself on being able to bridge the gap between end-users, customers, and senior management, ensuring that information security is a key consideration in projects, incidents, and normal business activities.

EXPERIENCE

INFORMATION SECURITY MANAGER

Cloud Direct, Bath UK / October 2018 - Present

- Development of new products and services alongside Practice Area Leads and Senior Management.
- Responsible for the creation of a 24/7 SOC Team, based across the UK and RSA.
- Responsible for all elements of internal security, working closely with specialist teams within the company.
- Successful projects include rollouts of Azure Information Protection, Intune, and Privileged Identity Management.
- Completion of risk assessments and reviews of internal systems and customer projects.
- Maintain awareness of current and emerging threats and vulnerabilities.
- Security Cleared.
- Accountable for the development and testing of the company Business Continuity Plan.

ISO PROJECT MANAGER

Cloud Direct, Bath UK / January 2017 - Present

- Responsible for all elements of the company ISO27001, ISO20000, Cyber Essentials, and Data Protection compliance programme.
- Management of security monitoring, auditing, and corrective and preventative actions arising from breaches, incidents and non-conformances.
- Responsible for increasing information security and data protection awareness through continued staff training and other development activities.
- Company Data Protection Officer, responsible for dealing with internal and external data protection requests. Also hold the roles of Risk Manager, Change Manager, and Problem Manager.
- Completed a 6-month project to incorporate 6 acquired companies into the ISO programme.
- Successfully passed 2 ISO9001, 4 ISO20000, and 5 ISO27001 external audits.
